eaware®

tackling online safety in a fun & creative way

Home Learning Guide

To help you get the most out of your eAWARE subscription we have created the following guide to allow you to begin using the eAWARE programme as a distance learning tool.

This guide is also available to download as a PDF from the Assessment guides section of the Teacher dashboard.

The below infographic gives you everything you need to know to get started but we have also enclosed a more detailed guide.

Step 1

Log into your teacher dashboard and create a child assessment and if desired a parent assessment. Please ensure the date and times are suitable for your requirements.

Remember by default all assessments start at 9:00am and are available till 3:30pm Monday to Sunday.

Step 2

Send all parents and students the unique code asking them to enter this in the pupil assesment section of www.schools.eaware.co.uk to complete the assessment.

We've created an email template for you to send to parents explaining how to do this. See our detailed guide below.

Step 4

Download classroom worksheets and email these to students for completion.

Step 3

Advise the pupils to use the same code to enter the Learning Pathways section on www.schools.eaware.co.uk to watch the learning pathway videos.

Step 1

To change the default availability of an assessment follow the shown in the capture below:

You can now change the availability of an assessment to be only of specific days and only live at certain times. When editing times please ensure you format the times with a colon. For example, 8am being 08:00.

Step two:

Please remember that if you are creating a parent and child assessment these will both have unique codes.

We've created an email template for you to send to parents explaining how to do this. This can be found at the end of the document.
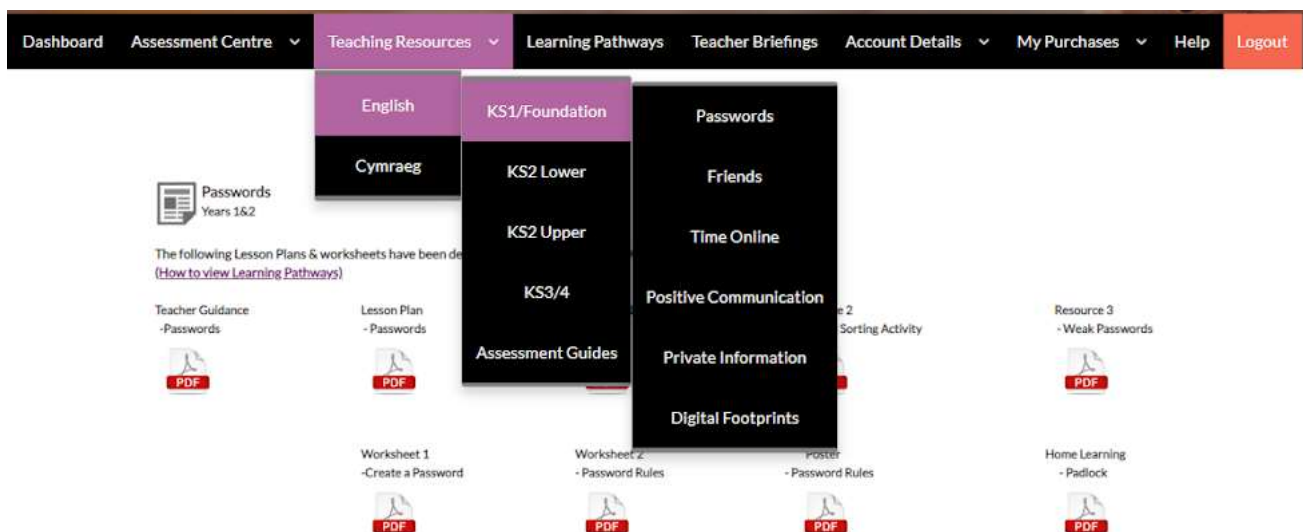

Step 3

If you would like your students to review the education video-based learning resources at home with their parents they can enter the same child assessment code in the blue box to access the key stage relevant material. Please see below:

Step 4

If you would like your students to complete the available worksheets for the topic of study these can be downloaded as PDFS from the Teaching Resources section of the Dashboard as shown below:

Please remember that if you require any further help or support our school liaison team is always on hand to help and can be contacted via
hello@eaware.com or 0800 047 1913.

Draft email to send to parents:

Dear Parent,

During these challenging times as part of our commitment to teaching online safety this academic year we are working with eAWARE.

eAWARE is an online safety programme designed by educational psychologists, teachers and child protection experts covering online safety topics in a fun and creative way.

To support what we are doing in school, we would like you and your child to complete an anonymous survey focussing on your child's use of the internet.

Both surveys can be completed on any connected device, including a smartphone, and should take no longer than 5 minutes.

All responses are totally anonymous and we, nor eAWARE, do not collect any personal data from you.

To begin please visit **https://schools.eaware.co.uk**, click the Teacher log in icon top right and enter the following code in the orange Assessments box as shown below:

For the parent assessment enter code: (INSERT CODE)

For the child assessment enter code: (INSERT CODE)

The assessment will **only** work between **X**am and **Y**pm Monday to Friday up to **<END DATE>**

Once an assessment has been completed you can use the same code in the blue Learning Pathways box. (Remove this line if you would like to undertake learning in the classroom).

Thank you in advance,
(SCHOOL NAME)
